**INTEGRATED SECURITY GROUP (ISG) EARNS ANOTHER LISTING FROM UNDERWRITERS LABORATORIES (UL) AS A PROVIDER OF UL 1641 CERTIFICATED SYSTEMS, UL1641 INSTALLATION & CLASSIFICATION OF RESIDENTIAL BURGLAR ALARM SYSTEMS.**

Meriden, Connecticut (September 1, 2010) Integrated Security Group (ISG), a leading provider in the security industry has added another Underwriters Laboratory (UL) Listing to the many services it provides to the commercial, government and residential markets. ISG now carries the (UL) Listing in the Certificate Service Category CVWY Residential Alarm Systems.

The CVWY Listing allows ISG to install, maintain and service alarm systems certified as Residential Alarm Systems more commonly known as UL 1641. These systems under this standard have not had much popularity over the years even with the explosive growth of the residential home security market since the mid 1990's. We believe that offering consumers an opportunity to realize the benefits of a company that follows the standards published by such a highly respected organization as Underwriters Laboratory (UL) will ultimately lead to a better protected home and family.

We are excited about our continued association with UL and the earning of another certification in this all important and completely overlooked category and market. Our decision over a year ago to enter the home security market was born from the repeated requests from our commercial clientele over the years to assist them with the protection of their homes and families. We have largely remained absent from the home market due to a lack of quality affordable choices until now.

Our desire has always been to provide the finest level of service possible, now we have the opportunity to redefine the residential home security marketplace through educating consumers with the know how to be safe and to provide an affordable security system, a real system that incorporates many if not all the same principles we use every day in the protection of banks, jewelers and other high-risk, high security environments. As our new website ([www.isghomesecurity.com](http://www.isghomesecurity.com)) exclaims "Could there be anything more important than protecting your home & family?"

## Integrated Security Group

With the dramatic growth in the home security market over the last two decades we have seen an erosion of good fundamental practices by many companies out there leaving consumers living under a true false sense of security. This is one of the reasons we have chosen to undergo the evaluation by Underwriters Laboratory (UL) to assist those seeking a real solution, real security based on proven principles and practices and not just a system through mass-marketing or some other gimmick. Security is a serious business requiring a disciplined approach to each home and family.

“We are proud to add this new listing and all it brings to our company” Azano said as “we are also UL Listed for Commercial Security and Fire alarm installation and service under the CVSG Burglar Alarm System (Mercantile), UUJS Signal and Fire Alarm Equipment and Services, Protective Signaling, Local, Auxiliary, Remote Station and Proprietary and National Industrial Security Systems (UL2050) CRZH Categories. These listings demonstrate our commitment to a superior level of service for our clients throughout the region we serve”.
